

When to Use the On Top 9.5 IS Desktop Icon

After On Top 9.5 is installed there will be two new icons on your desktop.

For those that have a dual monitor setup with Windows Extended Desktop enabled, the "On Top 9.5 IS" icon will start the program with the Instructor's Station (IS) enabled on the second monitor.

If you only have a single desktop monitor on your system, the 'IS' icon will not work correctly and should be deleted to avoid any confusion.

See the section entitled "Dual Monitor Support" on page 8 of the On Top Pilot's Operating Handbook for more details.
