Prepware 2009

Announcing Prepware 2009, our FAA Knowledge Exam prep software. As with all previous versions, users can take true-to-form practice exams and get immediate feedback on whatever test areas need more work. Each Prepware title includes all aircraft categories—you tell the software which test you're preparing for, and the study sessions and practice tests are generated accordingly. Prepware 2009 includes the new FAA Knowledge Exams effective June 30, 2008.

Orders will begin shipping July 30, 2008. Returns for unused, unopened 2008 Prepware products will be accepted from distributors only through September 30, 2008 for full credit.

The Prepware 2009 user interface features a performance graph depicting total score and a score for each subject, as well as the test itself (shows your selected answer, the correct answer and explanation). Build a custom-made follow-up quiz from your airman test report by plugging the learning statement codes into the program. Features for Prepware 2009 include:

- Compatible with both PC and Macintosh systems.
- CX-2 electronic flight computer built into the program, accessed by a click of a button during study sessions or simulated tests.
- Make and save user notes while studying, in a notes field.
- “Google”-like search capabilities...search for a word or phrase in the entire database of questions, answers, and explanations.
- Shuffle the answer stems for a true test of knowledge.
- Includes a comprehensive and searchable glossary.
- Simulates the CATS testing center in screen layout, buttons, program navigation.
- You can choose to print results, or email them to instructors or ASA to obtain an endorsement to take the official FAA test.
- Built-in study guides are there at a click of a button for study sessions, with the same comprehensive text and figures from ASA's Test Preps and Fast-Track Test Guides.
- All figures are available onscreen.
- Download and automatically update the database each time the FAA releases new or changed questions; also, the free email subscription service keeps you informed any time a change is made.
- *Prepware School* lets instructors build, save, and issue tests to their students; a comprehensive tutorial is provided for quick orientation to the extensive features!
- Students can obtain their endorsement to take the official FAA test from ASA, at no additional charge!
