2009 Test Books, Software, and DVDs Coming Soon!

The FAA is scheduled to release new tests on June 30 for the Pilot and Mechanic Knowledge Exams. None of the Computer Testing Supplements (“CT-8080s”) are changing this test cycle. The new *2009 Test Preps* (books for pilots), *Fast-Track Test Guides* (books for mechanics), *Prepware* (software for pilots and mechanics), and *Virtual Test Prep* (DVDs for pilots) will all reflect the latest test changes.

ASA will produce **Updates** to explain the changes, which may be downloaded free from the ASA website. Applicants using the 2008 test books and software will not have to “start over” with studying a new book—they may simply supplement the material in their 2008 books with the material from the free online Updates.

ASA’s **Test Prep Series** for pilots include the FAA questions and answer choices, explanations for correct and incorrect answers, references for all aircraft categories (airplane, rotorcraft, glider, lighter-than-air, weight-shift control, and powered parachute), and are arranged in chapters (with supplementary study text) based on subject matter for an efficient study program. Each *Test Prep* comes bundled with the same *Computer Testing Supplement* applicants will receive at the Computer Testing Centers, with the figures needed to take each exam. **NOTE: ASA-TP-FE is unchanged. Do not return for credit; your stock remains current.**

ASA’s **Fast-Track Test Guides** for Aviation Maintenance Technicians are written by industry expert Dale Crane, and prepare applicants for the Exams required for A&P certification. Each *Test Guide* includes the FAA questions, answer choices, references, and explanations, as well as a guide to the AMT Oral and Practical tests.

ASA’s **Prepware** combines all the information found in the *Test Prep* and *Fast-Track Test Guide* Series, with the benefits of computer-based training—including performance graphs, realistic practice tests, study and review modes, and built-in timers. The instructor utility, QuizMaker, generates pop quizzes or full-length tests, using FAA Knowledge Exam questions. A **free demo** of this program may be downloaded from the ASA website (www.asa2fly.com—Select “Products,” then “Demos”). **NOTE: ASA-TW-IA is unchanged. Do not return for credit; your stock remains current.**

ASA’s **Virtual Test Prep** lets students learn the material they need to ace the FAA Knowledge Exam right from their TV or computer DVD player by taking advantage of the latest developments in video production education. Students learn from the DVD, then work through all the FAA test questions using the accompanying test prep materials for a comprehensive aviation ground school.

See Page 2 of this Bulletin for Test Prep product details...
