New Test Prep Bundles Added Flexibility and Savings!

Five new bundles combine ASA's popular *Test Prep* book and *Prepware Download* for the ultimate in flexibility and savings. Today's hectic lifestyles demand efficient use of what limited study time is normally available. These bundles give test applicants the convenience of choosing whichever test preparation method is most convenient at any given time or location.

Each *Test Prep* book in the bundles is equipped with a *Prepware Download* instruction sheet and registration code. Software download is quick and easy. Applicants register their software and can be up and running in a matter of minutes.

ASA's **Test Prep Series** for pilots include the FAA questions and answer choices, explanations for correct and incorrect answers, references for all aircraft categories (airplane, rotorcraft, glider, lighter-than-air, weight-shift control, and powered parachute), and are arranged in chapters (with supplementary study text) based on subject matter for an efficient study program. Each *Test Prep* comes with the same *Computer Testing Supplement* applicants will receive at the Computer Testing Centers, with the figures needed to take each exam.

ASA's **Prepware Download** combines all the information found in the *Test Prep*, with the benefits of computer-based training—including performance graphs, realistic practice tests, study and review modes, and built-in timers. The instructor utility, QuizMaker, generates pop quizzes or full-length tests, using FAA Knowledge Exam questions.
