New FAR/AIM Series e-Bundles

ASA has built a reputation for providing the aviation community with the most accurate and reliable FAR/AIM products available. Our new e-Bundles are an excellent opportunity for you to get involved with the fast-growing demand for eBooks *and* provide your customers with a value-added product.

Flexible content delivery is no longer considered a luxury, but is a natural progression of our information-rich environment, and an expectation of today's tech-savvy users. Electronic flight bags (EFBs) are seemingly becoming as common as smartphones so it's no wonder that pilots want information in a variety of formats and across platforms. ASA FAR/AIM Series e-Bundles include both Book **and** eBook for one money-saving price. It's the information pilots rely on, conveniently accessible when and where they need it.

ASA's FAR/AIM products have been the standard regulatory reference of the industry for over 30 years!

- Most accurate, complete, and up-to-date content available.
- FREE e-mail update subscription service keeps readers up-to-speed on regulation changes throughout the year as changes are released by the FAA.
- FAR/AIM has a user-friendly, combined FAR and AIM index. Simply the easiest way to find what you're looking for fast!
- Changes and updates are clearly marked.

Fulfillment is simple. Each FAR/AIM Series e-Bundle book is marked on the *outside* to clearly distinguish it from its book-only counterpart. On the *inside*, end-users will find an activation code and simple instructions on downloading their eBook PDF. That's all there is to it. We'll take care of the rest.

The PDF format is widely compatible so pilots will be able to view their eBook on numerous computing platforms, including both PC and Mac computers, the iPhone®, iPad®, and iPod Touch®, eBook readers, and many other mobile computing devices.
