Prepware 2011

Announcing Prepware 2011, our FAA Knowledge Exam prep software. As with all previous versions, users can take true-to-form practice exams and get immediate feedback on whatever test areas need more work. Each Prepware title includes all aircraft categories—you tell the software which test you're preparing for, and the study sessions and practice tests are generated accordingly. Prepware 2011 includes the FAA Knowledge Exams effective July 2010 and will continue to provide changes through July 2012!

Orders will begin shipping September 3, 2010. Returns for unused, unopened 2010 Prepware products will be accepted from Distributors only through October 31, 2010 for full credit.

The Prepware 2011 user interface features a performance graph depicting total score and a score for each subject, as well as the test itself (shows your selected answer, the correct answer and explanation). Build a custom-made follow-up quiz from your airman test report by plugging the learning statement codes into the program. Features for Prepware 2011 include:

- Compatible with both PC and Macintosh systems.
- CX-2 electronic flight computer built into the program, accessed by a click of a button during study sessions or simulated tests.
- Make and save user notes while studying, in a notes field.
- “Google”-like search capabilities...search for a word or phrase in the entire database of questions, answers, and explanations.
- Shuffle the answer stems for a true test of knowledge.
- You can elect to show the correct answer *only*, or highlight the correct answer in Study Mode to streamline study efforts.
- You can select both Subject and Topic in Study Mode; i.e. Weather/Briefings, Weather/Winds Aloft Forecasts to keep study or quiz sessions short and on task.
- Includes a comprehensive and searchable glossary.
- Simulates the CATS testing center in screen layout, buttons, program navigation.
- You can choose to print results, or email them to instructors or ASA to obtain an endorsement to take the official FAA test.
- Built-in study guides are there at a click of a button for study sessions, with the same comprehensive text and figures from ASA's Test Preps and Fast-Track Test Guides.
- All figures are available onscreen.
- Download and automatically update the database each time the FAA releases new or changed questions; also, the free email subscription service keeps you informed any time a change is made.
- Students can obtain their endorsement to take the official FAA test from ASA, at no additional charge!
