## **2012 Test Books, Software, and DVDs**

The FAA is scheduled to release new tests in June for the Pilot and Mechanic Knowledge Exams. These are now “closed tests” which means the exact pool of FAA questions is not available to the public. ASA test prep materials are the most comprehensive in the industry, providing the largest sample of representative FAA questions, all of which are based on history and experience with the FAA testing process. In the proven effective ASA format, example FAA questions and answer choices are supported with comprehensive explanations, and the references from which the questions are derived is identified for further study. **Now more than ever, it is important applicants use the most trusted source to conclude their aviation ground school studies: ASA.**

Once the FAA tests are released the new *2012 Test Preps* (books for pilots), *Fast-Track Test Guides* (books for mechanics), *Prepware* (software for pilots and mechanics), and *Virtual Test Prep* (DVDs for pilots) will all reflect the latest test changes. ASA will produce **Updates** to explain the changes, which may be downloaded free from the ASA website. **Applicants using 2011 test books will not have to “start over” with studying a new book**—they may simply supplement the material in their 2011 books with the material from the free online Updates.

ASA’s **Test Prep Series** for pilots support the sample FAA questions and answer choices with explanations for correct and incorrect answers, references for all aircraft categories (airplane, rotorcraft, glider, lighter-than-air, weight-shift control, and powered parachute), and are arranged in chapters (with supplementary study text) based on subject matter for an efficient study program. Each *Test Prep* comes bundled with the same *Computer Testing Supplement* applicants will receive at the Computer Testing Centers, with the figures needed to take each exam.

ASA’s **Fast-Track Test Guides** for Aviation Maintenance Technicians prepare applicants for the Exams required for A&P certification. Each *Test Guide* includes sample FAA questions, answer choices, references, and explanations, as well as a guide to the AMT Oral and Practical tests.

ASA’s **Prepware** combines all the information found in the *Test Prep* and *Fast-Track Test Guide* Series, with the benefits of computer-based training—including performance graphs, realistic practice tests, study and review modes, and built-in timers. The instructor utility, QuizMaker, generates pop quizzes or full-length tests, using sample FAA Knowledge Exam questions.

ASA’s **Virtual Test Prep** provides a comprehensive ground school for students to watch right from their TV or computer DVD player, taking advantage of the latest developments in video production education. Students learn from the DVD, then work through the sample FAA test questions using the accompanying test prep materials.

**NOTE: ASA-VTP-PVT-WS and ASA-VTP-I remain in effect. Do not return for credit; your stock remains valid.**

Cover returns for unsold, unused, obsolete 2011 test books, software (CD-ROMs), and DVDs will be accepted from *Distributors only* through October 31, 2011 for full credit. Please return intact CT-8080s (figures books) with your test book covers, and return entire VTP courses intact. **None of the Computer Testing Supplements (CT-8080 figures books) are changing this year.**
