AMT Series Instructor's Curriculum Guide Now Includes Full-Color Textbook Images

The *Aviation Maintenance Technician Series: Curriculum Guide*, by Dale Crane provides A&P instructors and educators extensive course outlines, graphics, color transparencies, and tests to create an efficient and engaging training curriculum for their AMT students. The organization is based on the core curriculum from 14 CFR Part 147 Appendices B, C, and D, and covers every topic of the AMT Series.

The Curriculum Guide comes with the **AMT Prepware CD-ROM** so that instructors can use the "Quizmaker" utility to generate all types of exams, pop quizzes and master answer keys using actual FAA questions. Also includes the **AMT Graphics-Textbook Images CD-ROM**, now in full-color, which contains all the illustrations and tables from the AMT Series textbooks so instructors can create custom multi-media presentations for the classroom. Suggested reference materials and study questions are also included for further lesson and quiz planning. 482 pages.

Returns of unsold, unused ASA-AMT-CG will be accepted from ASA *Distributors only* through June 30, 2009 for full credit.
