## Instrument Plotter Updated

Recent scale changes to some NACO IFR Low Altitude Enroute charts have necessitated corresponding changes to the ASA Instrument Plotter. The plotter has been updated to reflect these changes and accommodates both NACO and Jeppesen charts.

Plotter Features:

- Made of durable Lexan® plastic so plotter won't warp or break in excessive heat
- 12 scales accommodate both NACO and Jeppesen instrument charts
- Conversion scale for Nautical and Statute miles
- Holding patterns depicted for both standard and nonstandard entries
- Compass roses allow quick course and bearing information
- Easy reading for enroute spot checks

Returns on CP-IFR will be accepted from **Distributors only** through May 31, 2008.
