2008 Test Books, Software and DVDs Now Available from ASA!

Newcastle, WA—The FAA released new pilot and mechanic knowledge exams June 25, 2007. ASA has more than 25 years experience working closely with the FAA and these tests, so applicants can be confident they are getting the most accurate and reliable information available when using ASA test preparation materials. In addition, ASA provides free updates on their website so applicants using 2007 books and software can see all the changes and not have to “start over” studying a new book or program. A free email subscription service is available; applicants can sign up to be notified when changes are made to the FAA Knowledge Exam they will be taking.

ASA provides materials for all learning styles. If aviators prefer to read, highlight, and study anywhere, then the **Test Preps** (for pilots) and **Fast-Track Test Guides** (for mechanics) are their best answer. Test Prep book chapters are arranged based on subject matter to promote better understanding, aid recall, and thus provide a very efficient study guide. Each chapter has FAA questions and answer stems as well as explanations for both correct and incorrect answers. All the Test Prep books come with the same Computer Testing Supplement applicants receive at the testing centers, a full-color book that includes all figures, charts, diagrams and legends needed for each exam. ASA’s **Fast-Track Test Guides** for Aviation Maintenance Technicians are written by industry expert Dale Crane, and prepare applicants for the FAA Knowledge Exams required for A&P certification. As in the Test Prep Series, each Fast-Track Guide includes the FAA questions, answer stems, figures, references and explanations. In addition, the “Fast-Tracks” include a guide to the AMT Oral and Practical tests.

If aviators prefer to study on a computer, then **Prepware** is the solution. ASA Prepware combines everything found in the Test Prep and Fast-Track Test Guide Series along with the benefits of computer-based training. Detailed performance graphs and realistic FAA practice tests are all included in the programs. A “QuizMaker” utility is included for generating pop quizzes on any subject, using real FAA Knowledge Exam questions. The database can be updated electronically as the FAA releases new questions throughout the year.

For aviators who prefer to watch and listen in a virtual classroom, ASA’s **Virtual Test Prep DVD Ground School** will stimulate their learning. Exciting aviation footage, 3D graphics, professional flight instructors, and interactive onscreen quizzes bring the material to life either on a TV or computer DVD player. The applicable Test Prep book is included with each course.

*Materials available for these FAA Knowledge Exams—
please contact us or visit www.asa2fly.com for more details:*

- Sport Pilot • Private Pilot
- Instrument Rating • Commercial Pilot
- Certified Flight Instructor • Flight Engineer
 - Airline Transport Pilot
 - Air Traffic Control
- Aviation Maintenance:
