Flight Instructor PTS Updated! For Instructors, Examiners and Applicants

Newcastle, WA—The FAA has released new Practical Test Standards (PTS) for the Certified Flight Instructor (CFI). Last updated in 2002, the new standards are effective November 1, 2006. New tasks have been added, including: awareness of Temporary Flight Restrictions (TFRs), runway incursion avoidance procedures, carburetor fire hazards, course of action if selected touchdown point will be missed, accelerated stalls, and emergency descents.

Fundamental to a successful checkride, each PTS guide is written by the FAA and details the skills and knowledge that must be demonstrated before an examiner can issue a certificate or rating to an applicant. They're used by instructors, students, and examiners to prepare for, review, take, or issue the checkride. The PTS also list the knowledge and experience prerequisites, the levels of skill that must be demonstrated, and describe background study and reference materials.

The PTS is *the* guide for students, instructors, and FAA-designated examiners to know exactly what the FAA expects, performance-wise, on a checkride. ASA reprints the most current popular PTS in handy cockpit-sized guides. Effective dates, updates, and PTS not printed by ASA are available via free download from the ASA website www.asa2fly.com so instructors have access to the most current information.

ASA's *Certified Flight Instructor Practical Test Standards* books are available for the CFI Single-Engine Airplane (ASA-8081-6CS) and Multi-Engine (ASA-8081-6CM). Soft cover, 5" x 8-1/4".
