New Book Provides Tools to Help Pilots Master Today’s Sophisticated Cockpits

Newcastle, WA—The new FAA *Advanced Avionics Handbook* provides general aviation users with comprehensive information on the advanced avionics equipment available in technically advanced aircraft (TAA).

VFR and IFR operations in aircraft with the latest integrated “glass cockpit” instrumentation are covered here, helping pilots understand which advanced avionics systems to use and when. Readers will learn the “knob-ology” associated with operating cockpit-computers, including data entry, maintaining current databases, and accessing information from the various screens. Common pilot errors, catching those errors, and instrument failures are discussed, as well as recommendations for using standby instruments during both normal and emergency operations. Each phase of flight is covered, so readers will know how to execute departure, enroute and approach procedures using glass cockpit instrumentation.

Subjects covered include the Primary Flight Display (PFD), Multi-Function Display (MFD), moving maps, terrain, cockpit weather, traffic data, fuel management systems, and electronic charts and checklists. Essential skills checklists and summaries conclude each chapter for a comprehensive review and quick-check reference. Soft cover, full-color illustrations, glossary, 8-1/4" x 10-3/4", 114 pages.

Title	Order Number	Suggested List Price
Advanced Avionics Handbook..... <i>ISBN 978-1-56027-758-3</i>	ASA-8083-6.....	\$19.95

ASA is an industry leader in the development and sale of aviation supplies, software, and publications for pilots, flight instructors, flight engineers, air traffic controllers, flight attendants, and aviation technicians. ASA’s corporate headquarters are located at 7005 132nd Place SE • Newcastle, WA • 98059.
