# Symphony Training Kits Available through ASA's Worldwide Network of Aviation Dealers

Newcastle, WA—ASA has been selected by Symphony Aircraft to provide FAA-approved primary flight training materials. ASA **Student Pilot Kits** provide the books and supplies a student pilot needs to complete training at an exceptional value. These kits ensure that FAA regulatory requirements are met, and are the perfect training solution for both instructors and students. With this in mind, Symphony Aircraft contacted ASA to develop a Student Pilot Kit specifically for their pilots' requirements.

The **Symphony Student Pilot Kit** comes with its contents packaged in an ASA Pilot Briefcase. Based on ASA's *Private Pilot Virtual Test Prep DVD Course* and *The Complete Private Pilot Syllabus*, the ASA Symphony Kit also includes *The Complete Private Pilot* by Bob Gardner as the primary textbook for this kit, and the top-selling ASA

FAR/AIM and *Private Pilot Test Prep* books assist in preparing for the FAA Knowledge Exam. The *Practical Test Standards*, *Private Oral Exam Guide*, and *Visualized Flight Maneuvers for High-Wing Aircraft* help take students through their Oral and Practical exams. The kit also includes a fiberboard E6-B flight computer and Ultimate Rotating Plotter for all flight planning, and a Standard Pilot Logbook for keeping track of flight time.

ASA student kits bring pilot training to a professional level, providing one-stop-shopping for the student and instructor.
