# **Aviation Maintenance Technician: Airframe Systems by Dale Crane**

## **Third Edition Available. Now In Full Color!**

Newcastle, WA— New full color third edition of popular Dale Crane book now available from ASA.

*Aviation Maintenance Technician: Airframe, Volume 2 - Systems* is the second volume of Dale Crane’s AMT Series. These textbooks were created to set the pace for maintenance technician training and attain a level of quality that surpasses all other maintenance textbooks on the market. *Airframe: Systems* covers the various systems involved with the airframe, encompassing electrical, fuel, cabin atmosphere control, instruments, communications and navigation, ice and rain control, and fire protection systems, and a discussion on aircraft inspections.

First published in 1994, this new Third Edition features full-color throughout. In addition, content was updated as a result of industry changes, new materials and practices, and new airplanes and cockpit systems. Written by industry expert Dale Crane, this book was also reviewed by an editorial team consisting of Aviation Maintenance Technicians, Inspection Authorization holders, university professors, aircraft owners, and aviation maintenance journalists.

Dale Crane’s textbooks consist of the most complete and up-to-date material for A&P training. The curriculum meets 14 CFR Part 147 requirements and subject matter knowledge codes from the FAA mechanics knowledge tests. They are designed for at-home, classroom, or university-level training. These comprehensive textbooks include charts, tables and full-color illustrations throughout, with an extensive glossary, index, and additional career information.

A study guide is included within each textbook in the form of Study Question sections, with Answer keys printed at the end of each chapter. These can be used for evaluation by an instructor or for self-testing. ASA’s mechanic textbooks are all-inclusive — no separate, inconvenient workbook is needed by the student or instructor. Soft cover, 480 pages, illustrated, indexed.
