**New! LED Flightlight from ASA**  
**Compact Design Perfect for Night Operations**

*Newcastle, WA*—The new AirClassics™ LED Flightlight from ASA is durable, compact, and bright — ideal for the flight bag where space and convenience are priority. The flashlight has both white and green bulbs, making this an effective tool for preflight, night flying and chart reading.

The compact 4-inch design is durable and lightweight, constructed of black aluminum alloy casing with the ASA wings logo imprinted in silver. The high-quality white and green LEDs provide super-bright, clear light and have a lifetime of over 30,000 hours. Typical battery life is a solid 10 hours. The rugged, rubberized on/off and color selector switch is simple to use and located in the tail cap to prevent accidental battery drain.

The flashlight includes a 6-inch lanyard and a durable nylon holster with resilient elastic that holds and protects. The stainless steel belt clip secures the flashlight to your belt, shirt pocket, logbook, kneeboard or chart wallet. Three extra heavy-duty AAA batteries are included.
