## **Headset Accessories Now Available from ASA!**

Newcastle, WA—ASA now offers a full selection of accessories to complement the popular HS-1 or other aviation headsets.

The **Microphone Muff** is the easiest and most effective way to protect the headset microphone and improve transmission clarity. Made of acoustically transparent Sonic Foam™, it protects against moisture, dirt, and debris and eliminates excess wind and background noise. It's hypo-allergenic and washable for years of trouble-free use. Simply pull the Microphone Muff over the headset mic and secure with included O-ring.

The new **Acoustic Foam Headset Earseals** are soft and light, yet rugged. These foam-filled earseals are a great way to add new life to old headsets. Pilots simply replace worn-out earseals and enjoy increased comfort, improved noise protection, and better communications.

The **Gel Headset Earseals** provide the ultimate in comfort and fit, and are a great way to add new life to headsets. The properties of the inner gel material allow it to flow naturally, distribute pressure evenly, and conform to head and facial contours. The result is absolutely the finest fit available.

The **Helicopter Adapter** provides increased headset versatility and features shielded tensile strength wire and a polyurethane casing. This rugged adapter/extension allows pilots to easily convert a general aviation fixed-wing headset for use in a helicopter.
