

Update to Airframe Test

Airframe Test Guide 2011

June 2011
ASA-AMA-11

With the following changes, ASA's Airframe Test Guide 2011 provides complete preparation for the FAA Aviation Maintenance Technician Airframe Knowledge Exam.

About the Test Changes

The FAA exams are "closed tests" which means the exact database of questions is not available to the public. The question and answer choices in this book provide the largest sampling of representative FAA questions available and they are derived from history and experience with the FAA testing process. You might see similar although not exactly the same questions on your official FAA exam. Answer stems may be rearranged from the A, B, C order you see in this book. Therefore, be careful to fully understand the intent of each question and corresponding answer while studying, rather than memorize the A, B, C answer. You may be asked a question that has unfamiliar wording; studying and understanding the information in this book and the associated reference documents will give you the tools to answer all types of questions with confidence.

We invite your feedback. After you take your official FAA exam, let us know how you did. Were you prepared? Did the ASA products meet your needs and exceed your expectations? We want to continue to improve these products to ensure applicants are prepared, and become safe aviators. Send feedback to: cfi@asa2fly.com

The Computer Testing Supplement did not change this test cycle. The CT-8080-4E remains in effect. The 2012 Test Guides are now available. **There were no new or changed questions this test cycle.**

The next test change from the FAA is expected in October 2011.
