ASA's *Airframe Test Guide 2018* provides complete preparation for the FAA Airframe Knowledge Exam. The only change to the Airframe test this cycle is that it now references the new Airman Knowledge Testing Supplement for Aviation Maintenance Technician (*FAA-CT-8080-4G*). Be sure to download and become familiar with the new figures.

**About the Test Changes**

The FAA exams are “closed tests” which means the exact database of questions is not available to the public. However, each test cycle the FAA provides a *What’s New* document, which identifies subjects that have been removed or added to a test. This document also includes pertinent information to ensure training and testing remain correlated, which in turn promotes a reliable certification system.

The question and answer choices in this book provide a comprehensive representation of FAA questions, derived from history and experience with the airman testing process. You might see similar although not exactly the same questions on your official FAA exam. Answer stems may be rearranged from the A, B, C order you see in this book. Therefore, be careful to fully understand the intent of each question and corresponding answer while studying, rather than memorize the A, B, C answer. You may be asked a question that has unfamiliar wording; studying and understanding the information in this book and the associated reference documents will give you the tools to answer all types of questions with confidence. We invite your feedback. After you take your official FAA exam, let us know how you did. Were you prepared? Did the ASA products meet your needs and exceed your expectations? We want to continue to improve these products to ensure applicants are prepared, and become safe aviation maintenance technicians. Send feedback to: cfi@asa2fly.com

The next FAA test change is expected in October 2018.
